| • Access Banking School of Excellence | Sep 2017 |
| • MasterCard Scholarship – Carnegie Mellon University | Jul 2022 |

TECHNICAL SKILLS & CORE COMPETENCIES

- Power BI
- Python, SQL, Excel
- ETL and Data Modeling
- Microsoft Azure (Data Studio)
- Data Quality and Data Visualization
- Business Intelligence & Decision Support
- API Integration, Microsoft Fabric

PROFESSIONAL EXPERIENCE

Team Lead, Senior Data Analyst (Hybrid)
Beacon Power Services – Ghana June 2023 – Present

- I lead the data analytics team to drive operational insights, enhance data-driven decision-making, and deliver scalable solutions in collaboration with Product and Tech teams.
- Designed and deployed executive dashboards for performance monitoring using Power BI.
- Enhanced data validation systems, improving monthly data quality from 40% to 77%.
- Led improvements in data architecture and API capabilities to support external partners.

- Engaged in data partnership exploration with financial institutions to enable new fintech solutions.

Applications / Database Administrator

First Atlantic Bank – Ghana

Nov 2019 – Jul 2022

- Automated operational and regulatory reports using SQL and BI ensuring timely monthly reporting.
- Maintained and optimized complex SQL queries on transactional datasets.
- Provided support for Flexcube core banking application (issue resolution, SLA management).
- Built and deployed interactive dashboards for business teams and compliance reporting.
- Collaborated with IT and compliance to align reporting solutions with regulatory standards.

Applications Support Officer

Access Bank – Ghana

Sep 2017 – Nov 2019

- Developed business reports and hosted them on BI platforms to reduce manual workflows.
- Ensured high system availability and disaster recovery of Flexcube environments.
- Supported routine EOD, EOM, and EOY processing and system integrations.
- Installed and maintained Oracle DB on Unix/Linux systems.

Graduate Trainee – Access Bank

Oct 2016 – Aug 2017

Teaching Assistant – KNUST

Aug 2015 – Aug 2016

SELECTED PROJECTS AND ACHIEVEMENTS

- **Data Quality & Validation Framework:** Led a data quality initiative on the energy utilities platform, conducting in-depth SQL-based audits on incoming data. Developed validation rules for both frontend data entry and backend pipelines, resulting in a measurable improvement in the accuracy and consistency of utility data.
- **Revenue Assurance Model:** Developed ETL end-to-end dashboard to track revenue inflows against billing, and payment data contributing to a 15% improvement in revenue recovery.
- **Business Intelligence Reporting (SAP BO):** Designed and optimized SQL queries to automate monthly reporting for Finance, Credit, and Operations departments, significantly reducing manual effort and improving reporting accuracy and timeliness.
- **Performance Monitoring Dashboard:** Built a dynamic performance dashboard to evaluate and visualize field data collection across quality, quantity, and completeness metrics. This facilitated management oversight and directly influenced operational improvements and training strategies.
- **Product Usage Analytics Dashboard:** Created a strategic dashboard to analyze software usage patterns among utility clients. Provided insights on feature engagement, high-usage zones, and underutilized modules, empowering the product and customer success teams to optimize feature rollouts and engagement campaigns.
- **Operational Efficiency Tracker:** Built real-time dashboards for internal operations teams to monitor task completion, SLA adherence, and bottlenecks. Reduced backlog by 20% through early identification and reallocation of resources.
